## PROJECTS

---

**Food Odering Web - Foodie** 🔗 | HTML, CSS, Javascript, React, Next.JS, Express, Node.JS, MongoDB **2024**

- **Mern-Stack Development** is available in this project
- A food odering website where a user can **register in register page with their Email-ID and Password** & after process the register, the website will show a successfully meassage.
- Then user can be **login in the login page with same Email-ID & Password** then access their account that they was craeted before.
- After access their account, user **can edit & save their profile interface**.
- If user are admin then the user **can create & edit categories, menu-items, etc.**
- Handle the database and integrated the module with other existing modules.
- Many more functions **dynamically work**.

**Spotify-Clone** 🔗 | HTML, CSS, Javascript, React, Express, Node.JS

**2023**

- **Front-end & back-end** are available in this project.
- All song would be shown by **back-end**
- All functions **dynamically work**.

**Todo List Saver** 🔗 | HTML, CSS, Javascript

**2024**

- **Front-end** are available in this project.
- To-do list & prices could be **saved, edited & deleted** by user
- To-do list & prices would be saved their **localstorage**
- At last this website would shown the total price of the to-do list

**Onetan.in** 🔗 | Next.js, TailwindCss, JavaScript, Node.js, Express.js, Socket, MongoDB

**2025**

- I have implemented **Mock Interview** with AI in this website.
- And more **frontend logic** have created by me in this website.
